Introduction

ABOUT THIS REPORT

Early childhood education and care in Canada 2012 is the ninth edition of similarly collected information developed by the Childcare Resource and Research Unit (CRRU). These reports on cross-Canada data on early childhood programs have been compiled and published about every two years since the early 1990s. The Childcare Resource and Research Unit's ECEC in Canada reports, together with the data available in *Public investments in early childhood education and care in Canada 2010* (a document developed by CRRU and published by Human Resources and Skills Development Canada (HRSDC, Government of Canada) are consistent in format, content and methodology.

Thus they form a body of information that is both comparative across Canada and longitudinal over a 20 year period. This makes it possible to identify trends and developments over time —information useful for research, policy-making and advocacy.

This report, published in 2013, considers early childhood education and child care (ECEC) in Canada during the period 2011 – 2012, using cross-Canada and longitudinal data. Due to cancellation of federal funding, it is more limited than were previous editions. It is a subset of the information provided in previous versions, focusing largely on regulated child care. Users of the data may need to refer back to previous editions of ECEC in Canada for information on child care regulations, specific funding programs, maternity and parental leave, information on federal ECEC contributions and detailed information on kindergarten. Note that some information on kindergarten is provided in both provincial/territorial sections and comparative tables in this report.

Like previous editions, this report relies primarily on provincial/territorial ECEC officials who kindly provided most of the data. These data, combined with data provided by Statistics Canada, easily available public information and data from the previous editions make up the longitudinal and current “snapshot” of regulated child care in Canada in 2012. Data sources are provided below.

For further information, please refer to [previous editions \(1992, 1995, 1998, 2001, 2004, 2006 and 2008\)](#) online and in print, to HRSDC's 2010 publication *Public investments in early childhood education and care in Canada 2010* (online only) and to CRRU's *The state of early childhood education and care in Canada 2010* (online only).

METHODS

Most of the data on regulated child care in this report were provided by provincial/territorial government officials. The method used to collect and verify data on regulated child care from each province/territory followed a series of steps. First, a written questionnaire was sent to each self-identified official with key responsibility who assembled the data. Following a review of the data by the researchers, clarification was sought from relevant jurisdictions where necessary. A draft was then compiled using material provided by government officials and other sources where applicable. Provincial/territorial officials vetted the completed sections.

Statistics Canada sources were used for demographic data.

Note that in some instances there may be minor discrepancies between previously-reported data, based on periodic reviews and updates undertaken by specific jurisdictions.

Every effort has been made to ensure the accuracy and consistency of the data provided in this publication and to use accurate and consistent terminology and categories across provinces/territories. This was not always possible due to the use of different terminologies, categories, data collection methods and missing information across Canada. In some instances, information that is consistent by date or definition was not available. Where this has occurred, dates and explanations have been provided or noted in the text or footnotes. The authors would appreciate being contacted if any discrepancies are noted.

DATA SOURCES

Number of Children 0-12 Years

Special tabulation based on the Labour Force Survey, 2012 Annual Average. Conducted by Statistics Canada.

Children 0-12 Years with Employed Mothers

Special tabulation based on the Labour Force Survey, 2012 Annual Average. Conducted by Statistics Canada.

NOTE: These data were reported in previous versions of ECEC in Canada as “Children 0-12 Years with Mothers in the Paid Labour Force”. The current report uses the term “employed mothers” but it is comparable to the data labelled “Children 0-12 Years with Mothers in the Paid Labour Force” in all previous versions of this report. The earlier term was ambiguous; it

could be interpreted as either mothers in the labour force (not all of whom are paid) or only those in the labour force who are paid (technically the same as “employed”).

Workforce Participation of Mothers by Age of Youngest Child

Statistics Canada, Labour Force Survey (2012 annual), CANSIM Table 282-0211

Children 0-14 Years Identifying with an Aboriginal Group

Statistics Canada, 2011 National Household Survey, Catalogue #99-011-x2011 026. These data on the number of children identifying with an Aboriginal group from the 2011 National Household Survey may or may not be comparable to data in previous editions of Early childhood education and care in Canada, which came from Long-form Census data.

Other data sources are noted in the report.

ACKNOWLEDGEMENTS

The authors very much appreciate the participation of provincial/territorial officials responsible for regulated child care in their respective jurisdictions who spent considerable time preparing and providing the information. Many thanks to you all for your kind assistance.

The financial contribution of the Muttart Foundation, on behalf of Saskatchewan and Alberta data, is most gratefully acknowledged with thanks.

Correction

Please note that this version of ECEC in Canada 2012 includes a correction from the version originally released in August 2013. The Canada figures in tables 11 and 14 (total allocation for regulated child care and allocation per space) have been corrected to reflect the most recent information. We would like to apologize for any inconvenience this may have caused.

December 2013

ABOUT THE CHILDCARE RESOURCE AND RESEARCH UNIT

The Childcare Resource and Research Unit, founded in 1982, is a Toronto-based policy research institute on early childhood education and care (ECEC) and family policy. Based on the best available evidence, CRRU works on behalf of a universal public system of high quality ECEC services and complementary family policy. CRRU's basic operating premise is that public policy should be based on the best possible information available from multidisciplinary research and policy analysis. All CRRU publications including this document may be downloaded from the website at www.childcarecanada.org.

Newfoundland and Labrador

OVERVIEW

Kindergarten is the responsibility of the Department of Education and regulated child care the responsibility of the Department of Child, Youth and Family Services. Kindergarten is provided on a part-day basis for all five year olds; attendance is not compulsory.

Centre-based child care is mostly operated on a for-profit basis, with some non-profit centres and several publicly-operated programs. Both agency-affiliated and individually licensed family child care models of regulation are used. The provincial government is in the process of implementing changes to ECEC, with a 10-year Early Learning and Child Care Strategy in the Ministry of Child, Youth and Family Services and an Early Childhood Learning Framework in the Ministry of Education.

Prince Edward Island

OVERVIEW

Until 2010, kindergarten was delivered by child care centres under child care legislation but has moved to the public education system, becoming a compulsory full-school day program for five year olds. Regulated child care has been under the Department of Education and Early Childhood Development since 2007. Centres, delivered by for-profit and non-profit operators, now include Early Years Centres, which are governed by new provincial policies.

These policies include provincially-set parent fees, required spaces for infants and children with special needs, mandatory parent advisory committees, established staff wages and benefits, new early learning (curriculum) framework, revised certification and training requirements and a formula-based, unit funding approach. When the new policy was introduced, existing centres were given the option to apply for designation as Early Years Centres, remain regulated private centres or retire their licenses. Government determines the number of Early Years Centres based on demonstrated community need.

OVERVIEW

Since 2011-2012 and continuing forward, kindergarten, referred to as Grade Primary, is the responsibility of the Ministry of Education. Grade Primary is full-day for children who turn five by December 31st of the calendar year in which they are enrolled, and is optional. The speech from the Throne on March 26, 2013, identified that the responsibility of regulated child care will transition to the Department of Education and Early Childhood Development throughout 2013-2014. Child care is delivered in both non-profit and for-profit centres. There is no publicly operated child care.

Total regulated child care \$43,221,873

Other funding

Early Childhood Education Training Initiative	\$791,668
Early Childhood Education Assistance Program (ECEAP)	170,402
Continuing Education	206,645
Family Resource and Parent Education	2,157,500

5 Portion reported reflects the remainder of forgivable loans paid in 2009/10, as issued to approved licensed child care facilities in the 2009/10 fiscal year. Repayable loans issued are not reported as expenditures.

6 Portion reported reflects forgivable loans only, as issued to approved licensed child care facilities. Repayable loans issued are not reported as expenditures. This amount reflects projects carried forward from the 2009/2010 fiscal year.

7 The Child Care Operating Grant (CCOGS) and the Stabilization Grant were replaced with the Early Childhood Enhancement Grant (ECEG) in 2010.

New Brunswick

OVERVIEW

New Brunswick moved responsibility for kindergarten, regulated child care and other early childhood development programs into the Department of Education and Early Childhood Development in 2011. Kindergarten is a compulsory full school-day program for five year olds. New Brunswick is an officially bilingual province with parallel English and French public education sectors. French and English kindergartens are delivered as part of those two sectors; with 2012 amendments to the Early Learning and Childcare Act, child care centres will become part of the province’s dualistic approach to French and English. Regulated child care centres are predominantly for-profit, with some non-profit centres, and no publicly-delivered child care. Regulated child care spaces are termed “approved spaces”; regulated family child care homes are termed “community child care homes”, and parental leave is termed “child care leave”.

<i>Number of francophone child care centres</i>	214

1 These figures are estimates made by provincial officials. New Brunswick approves child care centres for a total enrolment based on usable space and does not allocate spaces according to specific age groups. The number of spaces the facility operates per age category is collected through the Quality Improvement Funding Support Program's application process.

2 This figure represents the number of children receiving Integrated Day Care Services as of March 31, 2012. The average monthly number served for 2011/12 was 220. In addition to the total reported here, 97 school-age children were supported through the Support Worker Program.

3 This figure is the number of children receiving subsidies as of March 31st, 2012. Note that New Brunswick is reporting annual cumulative totals. Thus, this figure is not comparable to the numbers reported in the various editions of Early Childhood Education and Care in Canada. The cumulative total is 5,320. Totals are also collected using different age ranges than those asked within the survey.

4 The part-day nursery school/preschools and combined nursery/school figures are estimates as the data cannot identify part-time programs.

Sponsorship of regulated centre-based spaces

Quebec

OVERVIEW

Provision of early childhood education and child care in Quebec is under two ministries, the Ministère de l'Éducation, du Loisir et du Sport (MELS) and the Ministère de la Famille et des Aînés (MFA).

Quebec provides full-day kindergarten (maternelle) for all five year olds and some kindergarten (pre-maternelle) for four year olds under MELS.

MFA is responsible for regulated child care for children aged 0-4. Regulated child care includes centres de la petite enfance (CPEs) which operate as small non-profit networks of several "installations" or centres; CPEs often include regulated family child care as well. Family child care providers are supervised by Child Care Coordinating Offices (many of which are part of CPEs). Some regulated family child care is provided in group family child care homes, with two providers. There are, as well, for-profit centres (garderies). Quebec does not provide regulated part-day child care programs but permits them to operate as unregulated part-day jardins d'enfants.

CPEs, regulated family child care and some garderies are primarily publicly funded. Spaces in these programs are termed "reduced contribution spaces" for which parents pay a flat \$7.00/day fee. Quebec does not use fee subsidies targeted to eligible parents. All children aged 0-4 who have secured a space in a reduced contribution program may attend at \$7.00 a day regardless of family income or parents' employment status. Some garderies are unfunded; parents using unfunded garderies may be reimbursed an amount so that the cost is equivalent to \$7.00 a day.

School-age child care is operated by schools under MELS. It is available at the same flat \$7.00/day, (which applies when school is in session) as regulated child care for 0-4s. School boards are required to provide school-age care when there is sufficient demand.

Quebec has its own separate program for family-related leave and benefits (in other provinces/territories, the federal government is responsible for family leave benefits). There are two options that parents may choose: the Basic Plan and the Special Plan. Under these options, the Quebec maternity/parental leave benefits are paid at an income replacement rate of 70-75%. There is, as well, a paternity leave period earmarked to new fathers.

Ontario

OVERVIEW

There have been significant ECEC policy and program transitions in Ontario in the last few years. In 2010, regulated child care began to be transferred to the Ministry of Education which now is responsible for all aspects of policy and operation. Child care and full-day kindergarten are both part of the Early Learning Division in the Ministry of Education.

Ontario is the only province that offers kindergarten for all four year olds (Junior Kindergarten; kindergarten for five year olds is called Senior Kindergarten). Ontario is phasing in full-day kindergarten for four and five year olds, which will be fully in place by 2014. Child care for the rest of the before- and after- kindergarten day is to be offered when there is sufficient demand either as an “extended day” or by non-profit third party operators.

Municipal governments play a key role in child care in Ontario. This includes public delivery of child care services as well as financing, coordination, administration and planning. Forty-seven local government entities (CMSMs and DSSABs) are designated child care Service Managers. Child care licensing and overall policy and funding are provincial government responsibilities.

The majority of Ontario’s child care is delivered by a mixture of non-profit, for-profit and municipal, publicly operated programs. Regulated child care is provided in centres (including part-day nursery school) or by providers in their own homes supervised by licensed family child care agencies.

Children receiving fee subsidies⁶ (December 2011) 140,625

- 1 Breakdowns of full-day and part-day centre-based child care are not available except for school-age. Figures for nursery school (part-day) are not available.
- 2 The total number of centre-based spaces is not the sum of the age groups listed. This is a result of child care centres having alternate capacity rooms. Alternate capacity means that a room may be used for different age groups at different times. Therefore, the capacity by age group can exceed the total number of spaces.
- 3 This figure represents the enrolment in family child care. Licensed capacity information is not available because it fluctuates according to the ages of the children being served.
- 4 This figure includes the licensed capacity of child care centres and enrolment in regulated family child care.
- 5 This figure is a cumulative total number of special needs children serviced throughout the fiscal year. Figures comparable to other provinces/territories (that is, the number of children served at a given point in time) are not available.
- 6 This figure is the cumulative total number of children subsidized throughout the fiscal year. Figures comparable to other provinces/territories (that is, the number of children served at a given point in time) are not available.

PROVINCIAL ALLOCATIONS FOR REGULATED CHILD CARE (2011/2012)

One time funding none

Recurring funding (actual expenditures)

Wage subsidies/Wage Improvement	\$170,600,000
Special needs resourcing	48,500,000

Child care fee subsidies

Regular fee subsidies	353,300,000
Ontario Works subsidies	33,500,000

Early Learning & Child Development Grant (transfer to municipalities)⁹ 216,600,000

Transition funding 14,000,000

Other transfers to municipalities 28,700,000

Total¹⁰ \$865,100,000

7 The 3,966 centres “for pre-school age children” include centres that also serve school-age children.

8 This includes municipally-operated family child care agencies and homes. Current figures were not provided for the number of municipally-operated family child care agencies and homes.

9 This funding can be applied to fee subsidies, wage subsidies, and special needs resourcing by the local government.

10 Total may not add due to rounding. Ontario’s municipalities make legislated and discretionary financial contributions above this amount. In recent years legislated contributions have been approximately \$150M annually. Discretionary contributions have added almost \$60M more on an annual basis.

Manitoba

OVERVIEW

In Manitoba, kindergarten is a part-day non-compulsory program for all five year olds for which Manitoba Education is responsible. Regulated child care is under the aegis of Manitoba Family Services and Labour.

Manitoba provides operating funds to eligible child care centres through a “unit funding” model, and to regulated family and group child care homes. This operational funding is linked to regulated age group composition and a maximum parent fee set by the provincial government and incorporates fee subsidies for eligible families.

Regulated child care centres for 0-12 year olds (including nursery schools) are primarily non-profit with a few for-profit operations; there is no publicly-delivered child care. Regulated family child care is delivered through an individually licensed model; there is, as well, group family child care with two providers.

Total regulated child care **\$134,345,200**

1 Refers to the Family Choices Building Fund, created to offset costs of construction, expansion or revitalization of existing non-profit child care centres. The Fund provides one-third of total project costs up to \$400,000 for centres not in schools. The Fund also has a component that provides 100% of costs for centres located in schools or on school property, which is managed by Manitoba Education.

2 Includes all training, recruitment and retention grants.

OVERVIEW

Kindergarten, pre-kindergarten (pre-K) and regulated child care are all the responsibility of the Ministry of Education. Pre-K and regulated child care are under the Early Learning Branch and kindergarten is part of the Curriculum and E-Learning Branch. Kindergarten and pre-K are part-day. Kindergarten is for all five year olds, while pre-K is targeted to vulnerable three and four year olds who meet locally specified eligibility criteria. Both these programs are provided with no parent fee by school authorities.

In Saskatchewan, part-day preschools for children under compulsory school age are not funded or required to be licensed. Regulated family child care homes use an individual licensing approach; group family child care with two providers is offered.

Historically, regulated child care centres have been almost entirely non-profit. For-profit services receive no public funding including fee subsidies. There are several municipally delivered or supported centres.

⁷ Includes funds paid to licensed child care programs for tuition reimbursement, professional development, and northern training.

Alberta

OVERVIEW

Two ministries are responsible for early childhood education and care. Early Childhood Services (ECS), which includes kindergarten, falls under Alberta Education while regulated and approved child care falls under Alberta Human Services. Kindergarten refers to an education program in the year before grade 1. Younger preschool-age children with special needs may be able to access other ECS programs. Kindergarten is not compulsory and is usually part-day. ECS programs are publicly funded and may be delivered by various operators including public, charter and private schools and non-profit ECS operators.

About half the supply of regulated child care services for 0-12 year olds outside school hours are operated on a for-profit basis in Alberta. The remainder are mostly non-profit, with a small number of municipally operated or supported programs. “Approved” family day homes (family child care) operate under an agency model and are approved based on Ministry standards; there are no regulations. Group family child care homes (with two providers) are licensed. Out-of-school (school-aged) programs are provided for kindergarten and school-age children.

3 Annual report 2011/2012 authorized budget amount for child care including Accreditation totals was \$238,706,000.

4 Kin child care subsidy for eligible parents who use a non-custodial relative to care for their child.

British Columbia

OVERVIEW

Responsibility for BC's early childhood education and care is split among three departments: kindergarten under the Ministry of Education, regulated child care policy under the Ministry of Children and Family Development and child care licensing and monitoring under the Ministry of Health.

British Columbia introduced full-day kindergarten for five year olds in 2010. All public schools are now required to provide the program. Another ECEC program under the Ministry of Education, StrongStart BC, requires that children be accompanied by a parent or other caregiver. It is operated by most school boards for children younger than five years.

A variety of kinds of regulated child care programs for children 0-12 years old are provided including programs outside regular school hours for school-aged children. About half of BC's full-day centre-based programs are operated on a for-profit basis and half non-profit; there are no publicly-delivered child care programs.

Regulated family child care in BC for up to seven 0 -12 year olds is provided by individually licensed family child care providers. Family child care providers caring for one or two children are called "licence not required" (LNR). Neighbourhood Child Care Resource and Referral Programs may register these providers, in which case they are termed "registered licence not required" (RLNR) providers.

1,2 Information shows the number of licensed group child care spaces that received Child Care Operating Funding (CCOF) in 2011/12. Information on the number of child care spaces that do not receive CCOF is not available and is therefore not included in the totals; however, the majority of licensed child care providers in the province receive operating funding.

3 This represents children receiving special needs support through the Supported Child Development (SCD) program (2011/12) in both regulated and unregulated child care. The number of children receiving SCD services in regulated child care only is not available. The figure is cumulative over the year, so is not comparable to other provinces/territories.

4 These are monthly averages for 2011/12. The age groups have changed slightly to account for a new definition of school age.

5 Subsidies may also be used in unregulated child care. The number of these is not available. (See Other Funding, below).

OVERVIEW

Regulated child care and kindergarten in the Northwest Territories are both under the Department of Education, Culture and Employment (Early Childhood and School Services). Kindergarten may be full or part-day; most kindergartens are full-day. All regulated child care is non-profit with several part-day programs operated by school boards. Regulated family child care homes are termed regulated day homes.

Note that 2012 data was not available from the NWT; this section mostly uses 2010 data from *Public investments in early childhood education and care 2010* (<http://www.ecd-elcc.ca/eng/ecd/ececc/page15.shtml>)

Children receiving fee subsidies in regulated child care

Information not available.

1 2012 data was not available. This section uses 2010 data from *Public investments in early childhood education and care 2010*.

2 All centres are licensed for full-time spaces even though many operate as part-day nursery schools/playschools. Of the 803 preschool spaces for children age 2-5, 321 operate as part-day spaces.

Numbers of child care programs (2010)

<i>Centre-based</i>	
Full-day centres	26
Part-day nursery schools/preschools	20
Stand-alone school-age centres	13
<i>Total centre-based programs</i>	59
<i>School-based child care centres</i>	
For preschool-age children	14
For school-age children (Included in centre-based)	10
<i>Family child care</i>	
Individually licensed family child care providers	49

Sponsorship

All centres are currently non-profit and family day homes are considered to be non-profit.

TERRITORIAL ALLOCATIONS FOR REGULATED CHILD CARE (2009/10)

One-time funding	none
Recurring funding	\$1,500,000
Start-up and operating grants²	
Fee subsidies³	1,042,000
Total⁴	\$2,542,000

2 All licensed non-profit centres and family child care homes are eligible for start-up and operating funding. Breakdown between one-time start-up and ongoing operating grants is not available.

3 The fee subsidy budget includes subsidies used in both regulated and unregulated child care.

4 The budget allocations for fee subsidies and operating grants remains unchanged from 2004/05. However, in 2004/05 both budgets were under spent. In 2005/06 the expenditures for the operating grants came close to the amount allocated.

OVERVIEW

One department has responsibility for Nunavut’s regulated child care and kindergarten— Education. Kindergarten for five year olds is a part-day program. Regulated child care programs for children 0-12 years are all non-profit. Family child care homes are termed family day homes in Nunavut.

TERRITORIAL RESPONSIBILITY FOR REGULATED CHILD CARE

- 1 All child care centres in Nunavut are non-profit. Family day homes are considered to be non-profit.
- 2 One time capital funding to assist in the cost of building or renovating for the only community in Nunavut that did not have a physical space for a licensed full-time day care.
- 3 A breakdown between one-time start-up and ongoing operating grants is not available.
- 4 The fee subsidy budget includes spending on both regulated and unregulated child care.
- 5 The allocation for the Young Parents Stay Learning program is not comparable to previous years due to changes in parameters. In 2009/10 the actual spending was considerably higher than the allocation.
- 6 Funding for early childhood programs to enhance the development opportunities of children 0 to 6 years of age. This can be used for licensed or unlicensed early childhood programs.
- 7 Funding for District Education Authorities to provide/support early childhood programs that enhance the fluency of the Inuit language and knowledge of the Inuit culture. This can be used for licensed or unlicensed early childhood programs

Yukon

OVERVIEW

Regulated child care is under the aegis of Health and Social Services. Kindergarten is the responsibility of the Department of Education in Yukon and is part of the public school system. It may be part-day or full-day for five year olds. In some local communities there is also part-day kindergarten for four year olds.

Regulated child care for 0-12 year olds is for-profit and non-profit, with a predominance of for-profit services; there are no publicly operated programs. Regulated family child care homes are called family day homes and are individually licensed.

NU	949	147	8	1,104	11.8	20.8
YT ⁷	694	208	236	1,440	26.8	28.6
CA	503,229	343,156	137,746	986,842	20.5	22.5

1 Note that regulated family child care does not necessarily use the concept of “spaces” in the same way that it is used in centre-based child care; this figure may represent enrolment, not licensed capacity.

2 This calculation uses all regulated child care spaces – centre-based and family child care.

3 The total number of regulated spaces including regulated family child care cannot be used here as some of the provinces/territories cannot provide age breakdowns.

4 This number was calculated for children 0-4 years old; in PEI, NB and BC 2012 figures are not directly comparable to figures in earlier editions of ECEC in Canada. (QC’s figures are comparable to figures from previous years). Five-year-olds in these provinces are included in school-age child care spaces and attend full-day kindergarten in the public education system.

5 The total number of Quebec school-age spaces is from 2008. More recent information was not available.

6 The NT figures represent 2010 data; more recent information was not available.

7 YT provided total occupied spaces and total regulated spaces, but breakdown by type of service only for occupied spaces. Thus, the sum of centre-based, school-age and family child care do not equal the total regulated spaces above. Total regulated spaces have been used in the Canada total and in calculating coverage 0-12; the occupied space figure was used for calculating coverage 0-5.

TABLE 2 Selected characteristics of kindergarten. Provinces/territories 2012

	Full-/part-day for five year-olds?	Availability for four year-olds	Ministry/Department responsible	Is same Ministry/Department also responsible for child care?

MB	Part-day	Some	Education	No—child care in Family Services and Consumer Affairs
SK	Part-day	Some ³	Education (Curriculum and E-Learning branch)	Yes—child care in the Early Learning branch with Pre-K
AB	Part-day	Some ⁴	Education	No—child care in Human Services
BC	Full school-day	No	Education	No—child care in Children and Family Development and Health
NT	Full and part-day	No	Education, Culture and Employment	Yes
NU	Part-day	No	Education	Yes
YT	Full and part-day	Some	Education	No—child care in Health and Social Services

1 Shift announced; in process.

2 Will be fully implemented by 2014.

3 Pre kindergarten for three and four year olds is provided part-day in targeted communities for vulnerable children.

4 Kindergarten is part of Early Childhood Services (ECS); services may be available for preschool-age children younger than age five with a variety of special needs.

1 Date source for staff and director wages - the *You Bet We Still Care!* survey conducted by the Child Care Human Resources Sector Council (Flanagan, Beach and Varmuza, 2013).

2 2012 data specific to the territories was not available from *You Bet We Still Care!* as there were too few responses. Territorial data was however included in the Canada-wide averages. For data on wages in the territories see previous editions of *ECEC in Canada*.

TABLE 5 Minimum post-secondary early childhood training requirements for staff in full-time child care centres. Provinces/territories 2012

	Centre directors	Other full-time staff
NL	Two year ECE diploma	One year ECE certificate/ one staff member per group. Others - 30-60 hour course. In infant care/one year ECE certificate required—all staff.
PE	One year ECE diploma	One staff per centre—one year ECE diploma
NS	Training program in ECE or equivalent	Training program in ECE or equivalent - 2/3 of staff
NB	Director or designate OR ¼ of staff—one year ECE certificate or equivalent ¹	See centre directors
QC	Not specified	2/3 of staff in centres - college/university ECE OR one year.
ON	Two year ECE diploma/approved College of Arts and Technology (CAAT) or equivalent	One staff per group—two year ECE diploma from approved CAAT or equivalent
MB	Post-ECE diploma—continuing education certificate or degree program from an approved Manitoba post-secondary institution	ECE diploma from recognized Manitoba community college or Manitoba Child Care Program's Competency Based Assessment (CBA) program— 2/3 of staff for 0-6 year olds and ½ of staff for school-age and nursery school. All—40 hours of approved training within first year of work
SK	Two year ECE diploma ²	50% of staff - one year ECE. All—120 hour child care orientation course
AB	Two year ECE diploma	25% of staff - one year ECE certificate. All—orientation course or equivalent ECE-related course work (45 hours).
BC	Not specified	With infant/toddler groups up to 36 months -one staff with basic ECE training (902 hrs) at approved training institution plus one infant/toddler educator with specialized post-basic training (200 hours). With groups 30 months to school-age - one staff with basic ECE training.
NT	No training required	No training required
NU	No training required	No training required
YT	Not specified	20% of staff—two year ECD training or degree in Health and Social Services or Education plus 60 hour course. Additional 30% of staff—one year ECD training. All others—60 hour course.

1 All facilities not meeting staff qualification requirements by April 2006 were required to submit an action plan detailing how they would meet it.

2 Directors appointed to a centre director position prior to July 2001 require a one-year certificate or equivalent but must upgrade to a two-year diploma if they accept employment with another centre.

TABLE 6 Regulated family child care: Required ECE training and administrative model. Provinces/territories 2012

1 This data was reported in previous versions of *ECEC in Canada* as “Children 0-12 Years with Mothers in the Paid Labour Force”. The current report uses the term “employed mothers”; it is comparable to the data labelled “Children 0-12 Years with Mothers in the Paid Labour Force” in all previous versions of this report. The earlier term was ambiguous; it could be interpreted as either mothers in the labour force (not all of whom are paid) or only those in the labour force who are paid (technically the same as “employed”).

2 Further age breakdowns are available in each provincial/territorial chapter and in previous editions of *ECEC in Canada*.

3 Totals may not add up due to rounding.

4 Canada total figures did not include NT or YT until 2003, while figures for NU were not included until 2012.

1 Territorial information for 1995, 1998, 2003 and 2005 was not available. Territorial information for 2007, 2009 and 2012 is available but due to the use of different age categories, the information is not equivalent to other provinces so is not included here. For the most recent information for the territories, see individual territorial sections.

CA	371,573	425,332	516,734	593,430	745,925	811,262	837,392	867,194	921,841	986,842

- 1 These figures include full-day and part-day (nursery schools or preschools) centres for children under compulsory school-age, regulated family child care and school-age centre-based care. In most cases, these figures represent licensed capacity, not enrolment. Refer to provincial/territorial sections for further information.
- 2 Publicly funded kindergarten was part of the regulated child care system in PEI between 2000 and September 2010. For the purpose of comparison with other provinces, part-day kindergarten spaces in child care centres were not included in these space figures before 2012, so 2012 figures are not directly comparable to earlier figures.
- 3 Quebec's figures include school-age spaces under the Ministry of Education.
- 4 In 2006 a figure for school-age spaces in Quebec was not available. At that time, we calculated an estimate based on the ECEC in Canada 2004 figure of 141,977 school-age spaces, expanded using the same percentage increase as the increase in total centre-based spaces for children aged 0-4 from 2004-2006 – 13.7%. Quebec school-age figures were available in 2006 and 2008 but not in 2010 or 2012. The 2008 school-age space figure was used in 2010 and in these 2012 calculations.
- 5 Ontario's figures for total regulated spaces may not be comparable from year to year. In some years, Ontario was not able to determine whether regulated family child care spaces were or were not included in total regulated spaces.
- 6 School-age child care in Alberta became regulated for the first time in 2004. For purpose of comparison with previous years, the 2004, 2006, 2007, 2008, 2010 and 2012 figures include total number of spaces with and without school-age care.

1 This is an estimated expenditure provided by provincial officials.

2 Between 2000 and September 2010, PEI's kindergartens were part of the child care system. For the purpose of comparison with other jurisdictions, this calculation does not include PEI's spending on part-day kindergarten between 2000 and 2010. See PRINCE EDWARD ISLAND section for more detail.

3 Estimate.

4 This figure includes 2008 spending on school-age child care; more recent information not available.

5 Ontario's total allocation identified in *ECEC in Canada 2006* did not include \$296 million in the form of grants provided to municipalities under Best Start to support child care capital expansion and operating costs. Municipalities were to spend the funds for capital, fee subsidies, special needs resourcing, wage subsidies and wage improvement but information was not available to identify how or in what year these funds were spent. These funds have been added to the previous total in this table; the previous total allocation figure is in parentheses. Note that the 2007/08, 2009/10 and 2011/12 total allocations include a similar fund.

6 Subsidies in British Columbia may be used in both regulated and unregulated care. At one time, no breakdown was available. At the suggestion of provincial officials, these figures were estimated using 60% of the subsidy allocation in 1992, 55% in 1995, and 50% in 1998 – 2007/08.

7 As data for NT were not available in 2012, the 2010 figures were used in this table.

- 1 PEI introduced publicly-funded part-day kindergarten in September 2000; it was part of the regulated child care system, as it had been before 2000. In September 2010 kindergarten moved to the public education system. For the purpose of comparison with other jurisdictions where kindergarten is under the public education system, the number of children attending part-day kindergarten only have not been included in totals. Therefore, PEI's figures for 2001, 2004, 2006, 2008 and 2010 are not comparable to those of previous years.
- 2 This number was calculated for children 0-4 years old so 2012 figures are not directly comparable to earlier figures in PEI, NB and BC. In these provinces, 5 year olds are now included in school-age child care spaces, not in the preschool-age category (this has also been the practice in Quebec for some years).
- 3 In ECEC in Canada 2006, this figure was reported in error as 29.4%, due to the inclusion of school-age spaces. This has now been corrected by using a provincial estimate.
- 4 Nursery schools (part-time) are not regulated in Quebec, Saskatchewan and the Yukon Territory, so are not included in these figures.
- 5 Neither an age breakdown nor an estimate was available for Ontario for 1995. The 1992 figure is used in calculating the totals.
- 6 This figure has been amended to include the new information for New Brunswick.

- 1 PEI introduced publicly-funded part-day kindergarten in September 2000. At that time, kindergarten in PEI was still part of the regulated child care system, as it was before 2000. In September 2010 kindergarten moved to the public education system. For the purpose of comparison with other jurisdictions where kindergarten is under the public education system, the number of children attending part-day kindergarten only have not been included in totals.
- 2 Nursery schools (part-time) are not regulated in Quebec, Saskatchewan and the Yukon Territory, so are not included in these figures.
- 3 Quebec's figures include school-age spaces which are under the aegis of the Ministry of Education.
- 4 These percentages may not be comparable to those of previous years due to uncertainties about the data.
- 5 School-age child care in Alberta became regulated for the first time in 2004. For purpose of comparison, the 2004, 2006, 2008, 2010 and 2012 figures include total number of spaces with and without school-age care.

TABLE 14

Allocation in unadjusted dollars for each regulated child care space¹. Provinces/territories/Canada total 1992 – 2012

1 These figures based on total provincial allocations and total number of regulated child care spaces, therefore are rough approximations of actual allocation per space.

2 2001, 2003/04, 2005/06, 2007/08 and 2009/10 figures for PEI do not include part-day kindergarten expenditure in child care centres or spaces for the purpose of comparison with other jurisdictions.

3 Quebec figures include expenditure on school-age care from the Ministry of Education.

4 Ontario's total allocation in 2005/06 in ECEC in Canada 2006 did not include \$296 million in the form of grants provided to municipalities under Best Start to support child care capital expansion and operating costs. Municipalities were to spend the funds for capital, fee subsidies, special needs resourcing, wage subsidies and wage improvement. Information was not available to identify how or in what year these funds were spent. These funds have been added to the 2005/06 total, thus increasing the allocation per space in this table. The previous total allocation figure is in parentheses. Note that the 2007/08 and 2009/10 allocations include a similar fund. (See ONTARIO section for further explanation.)

TABLE 15 Percent of regulated centre-based spaces that are for-profit. Provinces/territories/Canada total 1992-2012

1 Kindergarten was part of the child care system in PEI until 2010, when it moved into the public school system. For the purpose of comparison with other jurisdictions, PEI figures did not include part-day kindergarten spaces until 2012. Therefore, 2012 figures may not be directly comparable to previous years.

2 Percent estimate provided by provincial officials.

3 QC figures have been calculated including school-age child care spaces which are under the Ministry of Education. The figure used for school-age spaces comes from 2008, as an up-to-date figure was not available.
