EXCERPTS

It is critical for Colorado to fully understand the impact of the pandemic on child care and other early childhood services. Through comprehensive data collection and analysis, Early Milestones is identifying actions that can be taken to rebuild the sector quickly, enable families to get back to work, and prepare for future crises.

Beginning with a survey of Colorado families, child care providers, and early educators, we are engaging the research-policy-practice loop with system-level and research partners to determine sector needs and solutions. The results of this work will be made available in a dashboard and reports to inform funding, practice, and policy decisions.
