## Details

The fourth Early Years Conference will explore how relationships influence a child's emotional experiences and life-long well being. How do our services contribute to a family's growth and happiness? How do we promote the physical, emotional and spiritual growth of a child? As service providers, how do our relationships with families support the health and happiness of children? This multidisciplinary group of presenters and participants will address relationships about children, families, communities, support programs and professional services. Workshops will include discussions of specific strategies for supporting children and families with varied abilities.

### CONFERENCE OBJECTIVES

This conference will provide opportunities for learning about programs and research relating to:

- Diversity in Parenting
- Attachment/Special Attachment Issues
- Infant/Adult Mental Health
- Relationship Issues for Children in Care
- Supporting Children with Specific Disability
- First Nations/Aboriginal/Metis Topics
- Collaborative Relationships in Supporting Families
