Description: Persistent poverty and growing inequality are the most significant and intractable challenges facing Canada today, diminishing the lives of thousands of individuals and families. Poverty Reduction Policies and Programs provides the context and insight to understand and act in the fight against poverty in Canada. This first collection of reports – Poverty Reduction Policies and Programs – identifies current federal, provincial, and territorial approaches to poverty reduction, alleviation and eradication, profiles the ideas, interests and institutions that have shaped the evolution of that work, and identifies critical issues for each jurisdiction moving forward. Canadian programs identified that prevent and reduce poverty include: -Seniors benefits; -Child and family benefits; -Social Assistance programs; -Employment related benefits; -Minimum wage regulations. Canadian programs identified that provide supports to the poor include: -Employment training; -Community economic development; -Early childhood education and care; -Home and nurse visiting.
