

The great child care debate: The long-term effects of non-parental child care ^[1]

Gillian Doherty

14 Jan 1996

Occasional paper 7

78pp

\$10

This paper reviews studies that compare children with non-parental child care experience to children without this experience. Two major themes emerge from this review: first, the research does not support the view that participation in child care is harmful; and second, it is important that the child care experience is of high quality.

TABLE OF CONTENTS

Summary

1 Context

Introduction

Selection of the studies

Contemporary realities

Future realities

The great debate

The purpose of this paper

The format of this paper

2 Non-Parental Child Care Before Age One

Introduction

Extensive non-maternal child care in infancy and the security of the attachment between mother and child
