Abstract:

The Annie E. Casey Foundation's 2012 KIDS COUNT® Data Book shows both promising progress and discouraging setbacks for the nation's children: While their academic achievement and health improved in most states, their economic well-being continued to decline. This year's Data Book uses an updated index of 16 indicators of child well-being, organized into four categories: Economic Well-Being, Health, Education, and Family and Community. The new methodology reflects the tremendous advances in child development research since the first KIDS COUNT Data Book in 1990.
