Publication Date: 12 Jun 2013

AVAILABILITY

Online survey is no longer available

Description:

Humber College and the Back to Nature Network have begun an exciting new project to enable ECE practitioners to create learning experiences outdoors in natural spaces in all seasons. The goal is to produce an ECE guide that ECE practitioners feel speaks to them, is easy to use, and makes their lives more enriching and easier in benefiting the children in their care.

In forming content for the guide, we are asking for **Your Stories!** We want to know who you are and what you've done as a practitioner in Early Childhood Education in connecting children to nature in the outdoors.

Region: Ontario ^[2]
