Overview

The Government of Saskatchewan's vision for our province is to be the best place in Canada to raise children. To support this vision, we have developed Saskatchewan's Early Years Plan to help all children be safe, healthy and develop to their full potential in strong families and supportive communities.

Supporting Saskatchewan's children during their early years is a long-term priority for our government. This plan sets out goals and actions to improve early years programs and supports over the next five years. We will start by improving existing programs, re-focusing resources and eliminating gaps in services so young children and their families receive the right supports at the right time. Over time, we will invest in programs and supports that help meet the goals outlined in this plan and provide lasting benefit to Saskatchewan children and families.
