Budget website ^[1]

Within the balanced budget, government is introducing new measures to benefit B.C. families and help make family life more affordable, including:

...A new B.C. Early Childhood Tax Benefit will provide \$146 million to approximately 180,000 families with children under six years old, effective April 1, 2015. Families with young children can receive up to \$55 per child, per month. Most will receive the full amount, while those with family incomes between \$100,000 and \$150,000 a year will receive a partial benefit. About 90 per cent of B.C. families with young children are expected to be eligible.

B.C.'s new Early Years Strategy will invest \$76 million over three years to support the creation of new child care spaces and improve the quality of child care and early years services. Included within this, \$32 million will support the creation of new child care spaces and \$37 million will improve the quality of services available.
