<sup>1</sup> Note the drop in population of children 0-12 years over the decade. (See Table 27).

<sup>2</sup> PEI introduced publicly-funded half-day kindergarten in September 2000. (Kindergarten in PEI is still part of the regulated child care system as it was before 2000.) For the purpose of comparison with other jurisdictions where kindergarten is under the public education system, it has not been included in the calculation of the percent of children for whom there is a child care space. Therefore PEI's figures for 1998 and 2001 are not comparable.

<sup>3</sup> Nursery schools (part-time) are not regulated in New Brunswick, Québec, Saskatchewan and the Yukon Territory so are not included in these figures.

<sup>4</sup> Québec's figures include school-age spaces which are under the aegis of the Ministry of Education.

<sup>5</sup> By 2000, all regulated child care spaces that are part of CPEs became primarily publicly funded. See Québec section for more information.

<sup>6</sup> Information for number of children 0-12 years not available for the territories. Therefore, percent of children for whom there is a regulated child care space cannot be calculated and have been reported as n/a in the table.

<sup>1</sup> It is interesting to note that in some provinces, per child capita allocations increased while total provincial allocations dropped or were static. As Table 27 shows, the child population, especially in the younger age groups, has dropped in most provinces throughout the 1990s.

<sup>2</sup> Adjusted values based on Consumer Price Index, All-Items, Annual Averages (Index, 1992=100).

<sup>3</sup> In PEI, this figure does not include spending by the Ministry of Education for kindergarten although these are delivered in regulated child care centres.

<sup>4</sup> Subsidies in British Columbia may be used in both regulated and unregulated care. These figures have been estimated using 60% of the subsidy allocation in 1992, 55% in 1995, and 50% in 1998 and 2001.

<sup>1</sup> Figures based on total provincial allocations and total number of child care spaces. Figures are not adjusted for inflation.

<sup>2</sup> 2001 figures for PEI did not include part-day kindergarten expenditure or spaces for the purpose of comparison with other jurisdictions. Therefore, PEI's 2001 figures are not comparable to its earlier figures.

<sup>3</sup> Québec figures includes expenditure on school-age care from the Ministry of Education.

<sup>4</sup> British Columbia's figures use an estimate for provincial allocation because British Columbia allows subsidies to be used in unregulated care. These figures have been adjusted accordingly.

<sup>5</sup> It should be noted that in 2001, Québec's expenditure accounted for 58% of total Canada-wide spending (see Table 32).

<sup>1</sup> Number and percent of children subsidized in Prince Edward Island was calculated differently in 1992 and 1995, and therefore, are not comparable from year to year. Calculation was amended again in 2001 (2001 calculations did not include part-day publicly-funded kindergarten spaces). Therefore, 2001 is not comparable to earlier years for PEI.

<sup>2</sup> Québec began phasing out subsidies in 1997 as publicly-funded services were introduced. By 2001, Québec was no longer providing subsidies to selected families.

<sup>3</sup> Data for Ontario for 1995 and 2001 were not available. Using estimates provided by provincial officials, an estimate of 50,000 was added to the Canada total in 1995 and an estimate of 76,000 was added to the Canada total in 2001. Percents are estimated.

<sup>4</sup> 1994 data used.

<sup>5</sup> Subsidies may be used in both regulated and unregulated care in British Columbia. These figures are estimates of children in regulated child care receiving subsidies based on advice by provincial officials.

<sup>6</sup> Calculation did not include child care spaces in Québec and part-day kindergarten in PEI. Both are publicly-funded and do not rely on subsidies to selected families.

<sup>1</sup> This table provides information for one family type; see each province for further information.

<sup>2</sup> Adjusted values based on Consumer Price Index, All-Items, Annual Averages (Index, 1992=100).

<sup>3</sup> Québec now provides publicly-funded services rather than providing subsidies to selected families.

<sup>4</sup> In Ontario, municipalities determine eligibility level using a provincial needs test, in which income is only one factor.

<sup>5</sup> Effective April 2002, several changes were made to British Columbia's subsidy program. See RECENT DEVELOPMENTS for details.

<sup>6</sup> In the Northwest Territories and Nunavut, a needs test is used in which income is only one factor.
